

**Join our Next Webinar!**

Andressa Siroky and Carla Vivacqua, professors of statistics at the Federal University of Rio Grande do Norte in Brazil, will be giving the next ISEA webinar on **Thursday December 7, 2023 at 10:00am ET**. They will discuss a Statistical Engineering training and application initiative in Brazil that they have undertaken in collaboration with Geoff Vining of Virginia Tech. The webinar abstract is included below. [Click here to register.](#)

**Teaching and Applying Statistical Engineering in Brazil**

In this work we share our experience of teaching and applying Statistical Engineering. The initiative is led by the Federal University of Rio Grande do Norte (UFRN) in Brazil to undergraduate and graduate students in Statistics. Our efforts have been mentored by Geoff Vining, the primary initiator and founding Chair of ISEA. We provide an overview of the actions taken and the challenges we face, including subjects studied and partnerships we have established. We expect to spread the use of Statistical Engineering to solve problems and to contribute to the improvement of the training of students in the Statistics course at UFRN, as well as to serve as an example of how universities can implement Statistical Engineering as a discipline in their curriculum courses.
